NOTES:
1. Raised reflective markers that identify fire hydrant locations shall be placed one foot from street centerline of facing street. If hydrant is within twenty feet of the corner, an additional reflective marker shall be placed on the street perpendicular to the hydrant as shown above.

2. All thermoplastic marking material, traffic paint, and markers, shall be per State Specification.

3. Refer to Caltrans Standard Plans A20 for pavement markers and traffic striping not shown in this detail.

4. The application of traffic stripes and pavement markings shall be in conformance with Caltrans Specifications sections 84 and 85.

5. Crosswalks contiguous to school grounds are to be 12" yellow lines.
